

Training Services

(Courses of Instruction Matrix)

Prepared for: Public release

Prepared by: Kenneth Klothe, President/CEO

29 June 2015

Company document number: 02

Executive Summary

Objective

Trident Star Global (TSG) will provide training in order to execute a complete crisis action plan for your company.

Your corporate leadership and employees will be competent and proficient in decision-making skills associated with a crisis and for managing employees working in high-risk locations.

Security elements hired and employed by the company or client will have an opportunity to gain proficiency and update skills through professional instruction.

Goals

- Fully trained personnel able to react positively during crisis action.
- Risk awareness in corporate leadership and overseas employees.
- Proficiency with full-spectrum communications available to the company and overseas employees.

Solution

TSG will provide:

- Trained and experienced evacuation personnel - 28 years of personnel recovery experience.

- All-aspect training to the level desired of the client - enhance risk awareness and build a group coordinator/leader (site engineer, project engineer, etc.).
- Training tailored specifically for the environment, culture and various situations encountered by down-range employees.
- Conduct rehearsals and drills at home and at the high-risk location (if feasible).
- European and FAA-registered aircraft and certified crews dedicated for the mission.
- Appropriate mobility system for the situation and number of down-range employees (boat, aircraft, ground vehicles).
- Personal tracking beacons, satellite phones and encrypted mobile phones/tablets/laptops for use in training.

Overview

“Dig the Well before You get Thirsty.”

Major companies traditionally find opportunity in post-conflict and developing countries. They have the ability to sustain themselves through economic and political changes that occur in these types of countries. Major companies also have the ability to hire quality personnel and technical experts that can solve most development problems. The expert employees are a sought-after commodity. Also, they are a target for nefarious groups that roam freely in developing countries.

A company is made up of people. Equipment can be replaced, but personnel cannot be replaced. It is the company’s responsibility to protect its people. Prior planning is the most cost-effective method for a company to provide the required protection. If a commercial recovery is possible, it can still be very expensive for a company to shoulder the burden, liability and expense to rescue its personnel.

With pre-planning and employee training, company personnel can operate safely with the confidence that they are trained for their safe recovery. At an annual cost of 1/10th the cost of an evacuation, this becomes a cost-effective and operationally effective means of protecting your down-range employees. So, “digging a well before you get thirsty” makes good business sense when looking at sending employees to high-risk areas.

Trident Star Global and SOTCON offer comprehensive security solutions for government and private sector clients. We provided full service solutions, including management of security operations, security personnel and equipment, threat vulnerability assessments and training for security personnel.

Trident Star Global provides a high quality security service according international standards.

Our team consists of highly qualified and experienced security experts with longtime assignments in counter-terrorist forces. With their unique qualifications our team is able to address the entire scope of project management and training.

We provide training solutions tailored to the operation environment and the requirement of the client.

Resources and Equipment

Depending on the environment and location of the high-risk area, the type and range of equipment available will be sourced from the best provider. Even Satellite Communications vary in services. For example, Iridium has coverage everywhere, but Thuraya is focused on the Middle East and North Africa and therefore has much better rates for that region.

Bottomline, the equipment will be tailored for the needs of the region.

The following charts are examples of the some of the equipment Trident Star Global has used and can gain ready access. Trident Star Global utilizes small quadcopter UAVs for route surveillance and overwatch.

Resources and Equipment

Mobility Equipment	Range (NM)	Capacity	Cost
DeHavilland Dash 8	2000	60	TBD
Cessna C208B Caravan	1000	8	TBD
Cessna C182	500	3	TBD
